

BELT DRIERS **BT**

© SPALECK ENGINEERING

Dust-free drying of sensitive parts

Gentle drying of parts by hot air. A continuous cycle allows drying without contact. No use of drying media that may get stuck inside the parts.

MADE IN GERMANY

BELT DRIERS BT

Technical features:

- Electronically controlled heating system to warm the circulating air inside the drying tunnel
- Continuous temperature adjustment via thermostat
- No use of drying media that may get stuck inside the parts
- Wire mesh belt to transport the parts through the drying tunnel
- Frequency converter for a continuous adjustment of the belt speed

Optional features:

- Blow-off unit to remove process water
- Increased heating capacity

Technical data:

Description		BT240
Operating voltage	V Hz	400 50
Heating capacity	kW	25
Circulating air fan	kW	2,6
Max. temperature	°C	140
Belt speed	$\frac{m}{min}$	1 – 3
Space requirement	m ²	3,6

Dimensions in mm:

Description		BT240
Length drier incl. conveyor belt	A	3765
Length drying tunnel	B	2000
Width drier incl. control box	C	1500
Width drying tunnel	D	1000
Width conveyor belt	E	550
Length entry	F	1000
Length exit	G	500
Height passage	H	200
Bottom edge conveyor belt	I	575
Top edge conveyor belt	J	820
Top edge drier	K	1325
